SUMMARY

Full-Stack Developer and B.Tech CSE graduate with hands-on experience building production-grade MERN stack applications. Proficient in JavaScript, React.js, Node.js, MongoDB, and SQL, with strong knowledge of RESTful API design, data structures, and algorithms. Proven track record of delivering scalable, maintainable software in team environments.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, Socket.IO, Tailwind CSS, Bootstrap, jQuery

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, VS Code, Vercel, Render

Core Competencies: REST API Design & Integration, Data Structures & Algorithms, Database Design

EDUCATION

United University

Bachelor of Technology in Computer Science and Engineering — CGPA: 8.01

Prayagraj, India

2026

Kendriya Vidyalaya, New Cantt

Higher Secondary Certificate (Class XII) — 80%

Prayagraj, India

2022

Army Public School, New Cantt

Secondary School Certificate (Class X) — 76%

Prayagraj, India

2020

EXPERIENCE

Full-Stack Developer

University Development Programme, United University

Jan 2025 – Jun 2026

Prayagraj, India

- Built and deployed 5+ responsive web applications serving 100+ university users, improving cross-device accessibility and engagement
- Optimized MongoDB and MySQL queries, reducing average API response time by 40% and eliminating data inconsistency errors
- Delivered 3+ end-to-end MERN stack applications across the full SDLC, from requirements gathering to production deployment
- Collaborated with cross-functional teams of 4–6 members to define coding standards, conduct code reviews, and maintain scalable architecture

PROJECTS

HelpLink — Location-Based Community Assistance Platform

React, Node.js, Express.js, MongoDB, Leaflet, Socket.IO

Feb 2026 – Apr 2026

- Identified the gap in local community assistance and built a location-aware platform to connect help-seekers with nearby volunteers in real time
- Architected secure user authentication and role-based access using JWT, enabling distinct workflows for volunteers and requesters
- Solved real-time coordination by integrating Socket.IO for live status updates and Leaflet for interactive map-based request discovery

CivicLink — Smart Civic Issue Reporting Platform

React, Node.js, Express.js, MongoDB, Socket.IO, Leaflet.js

Jan 2026 – Mar 2026

- Addressed the lack of structured civic reporting by building a platform where citizens can submit, track, and escalate local infrastructure issues
- Designed a role-based system separating citizen submissions, authority dashboards, and admin controls — each with scoped REST API access
- Applied Socket.IO for real-time issue status updates and Leaflet.js for geolocation-based issue visualization on an interactive map

ACHIEVEMENTS & ACTIVITIES

- **IBM Experts Lab National Hackathon**, Bengaluru — Prototyped a scalable solution with IBM mentorship Aug 2025
- **SQL Bootcamp**, Y-Hills & Sony India — Advanced SQL, joins, indexing, and database design 2024
- **Machine Learning Bootcamp**, Y-Hills & Sony India — Supervised/unsupervised learning, model evaluation 2023
- **Volunteer, University Convocation** — Coordinated attendance tracking and data records for graduates 2025
- **Campus Recruitment Support, Prodesk IT** — Managed candidate logistics and coordination workflows 2025
